Course Syllabus: Spring 2015

Instructor: Boliang Zhu  
Office: 317 Pond Lab  
Tel: 814-865-6901  
Email: [bxz14@psu.edu](mailto:bxz14@psu.edu)  
Office Hours: TUE 2-4PM or by appointment  
Class Time: THU, 1:00-4:00PM, 236 Pond Lab

## **Course Description:**

This graduate seminar surveys the classic and contemporary literature in international political economy (IPE). We will focus on the key issues in this field, including trade, foreign investment, foreign aid, international migration, development, and conflict. The goals of this course are threefold: 1) to introduce you to the substantive literatures in the field; 2) to prepare doctoral students for the IPE component of the comprehensive exams in International Relations; 3) to complete an original paper that is potentially publishable or could lead to a large project.

## **Requirements:**

- Class Participation & Discussion Leaders (20%)

This course will be run as a discussion group. You're expected to **READ THOROUGHLY** the works assigned for each week and actively participate in class discussion. All readings will be posted on Angel. For each week's readings, everyone should come up with 2-3 questions for discussion. These questions should be posted on Angel by 5PM on Tuesday.

We will have one official "discussion leader" for each week. The discussion leader will not be those who are writing review essays for that week. The responsibility of the discussion leader is to comment on the review essays, and collect and synthesize the questions raised by other students to initiate the discussion.

- Review Essays (20%)

Each student will write two short review essays (3-5 pages, double spaced) on topics choosing from the syllabus. The review essay should not only summarize but also compare and criticize the readings. The review essay should be sent to all seminar members by 5PM on Tuesday and a hard copy is due in class. Other students are expected to read the review essays before class.

Your review essay should focus on discussing the strengths and weaknesses of the readings, how they speak to each other, and most importantly, what theoretical issues and empirical questions are raised. When criticizing the works, you could ask: Do the assumptions make sense? Is there any logical flaw in the theory? What are the possible alternative explanations? Are the findings convincing and generalizable? How could the research design be improved?

- Research Paper (40%)

Each student will write a research paper (about 30 pages, double spaced) that addresses an original research question or puzzle in the field of international political economy. The goal is to develop a potentially publishable paper. You will complete the paper in three steps:

### 1. Research Proposal Presentation

You will present your research proposal to the class on 2/19. The proposal (about 10 pages, double spaced) should be sent to all seminar members no later than 5PM on Friday (2/13). Everyone is required to provide written comments (no more than one page, single spaced) for other students. Your comments should be posted on Angel by 5PM on Wednesday (2/18).

To write a research proposal, you'll first need to come up with some original research question. This is the most difficult part. A research question often comes from reading and criticizing the existing literature. When you are doing the readings, think about what has been done on the topic; what else can explain the same phenomena; how you could improve the empirical test.

The next step is to develop a theoretical argument for your paper. Not every paper needs a theory. I encourage you to write a paper with some original theoretical argument. Based on your theory, you should develop a set of testable hypotheses. In addition, you need to discuss the research design in the proposal: How will you test these hypotheses (qualitatively or quantitatively)? How will the dependent or independent variable variables be measured? What data is needed? How will empirical analysis be conducted?

### 2. A Twenty-Page Draft Due 3/26

You will need to submit your first draft of the paper in class on 3/26. It doesn't need to be a complete paper, but should include a literature review, theoretical argument, and preliminary empirical results. I will read your draft and provide feedback for further revisions.

### 3. Mini-Conference Presentation (4/30)

We will have a mini conference for you to present the final paper to the class. The conference will mimic the format of APSA annual conferences to prepare you for real professional presentations. You will need to distribute your paper to all seminar members by 5PM on 4/24 (Friday). In addition, you should prepare slides and a 12 minutes presentation. There will be discussants for each paper. To make most use of the conference, all discussants should provide written comments and post them on Angel by 5PM on 4/29 (Wednesday). A revised paper, which should incorporate the comments received, is due a week later, by 5PM on 5/08.
